

spirit of excellence

Since 1906, our unwavering mission has been to improve patient outcomes through innovations in endoscopy. With over a century of expertise, we stand as a global leader in minimally invasive surgery, delivering solutions that not only enhance surgical results but also transform patients' lives. From the earliest stages of research and development to the meticulous moment one of our precision instruments is shipped to a medical facility, excellence is our guiding principle. Every innovation we introduce and every instrument we perfect strives to push the boundaries of what is possible in endoscopic technology. Driven by the pursuit of excellence, we are continuously motivated to help surgeons and patients.

We are pioneers in endoscopy.

We are engineers, craftsmen, clinical experts, and innovators.

We are outcome-driven and patient-focused.

We are Richard Wolf.

Spirit of excellence is the phrase we live by here at Richard Wolf Medical Instruments. Each day, excellence drives us in our mission to shape the future of minimally invasive surgery. From product development and manufacturing to sales and customer service; every facet of our business is an embodiment of this spirit.

To ensure this dedication to excellence is reflected across our entire product line, we collaborate with leading physicians around the world to gather vital clinical insights and learn how existing technologies can be made better.

The spirit of excellence extends beyond just our portfolio. **It is equally evident in our commitment to customers—strong partnerships rooted in a shared dedication to truly life-changing work.**

Our Endoscopes & Instrumentation

Precision. Versatility. Longevity. Superior optics and ergonomics. These are the characteristics that define Richard Wolf instrumentation. Through careful collaboration with respected physicians and surgeons, we have built a portfolio that is as innovative as it is extensive. Our endoscopes, hand instruments, and surgical imaging systems are used for a wide range of procedures and, above all, are designed to meet the needs of the surgeon and ensure the health of the patient.

Imaging Solutions

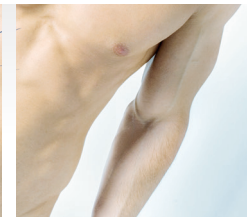

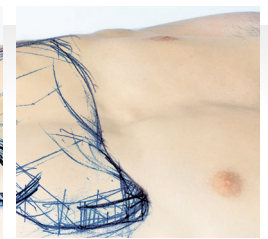

System green

ENDOCAM Logic 4K

When it comes to endoscopic imaging, Richard Wolf's is superior—the difference is in the details. We combine the brilliance of the image on display and advanced technologies to bring the picture to life for exceptional visualization. See more, do more.

The ENDOCAM® Logic Camera Platform combines stunning, high quality optics with superior user-friendliness, in addition to exceptional flexibility—a reflection of our dedication to transforming the digital imaging landscape through intuitive, software-based systems. This multi-disciplinary platform supplies access to a diverse portfolio of camera heads, including the ENDOCAM Logic Camera Head green for fluorescence guided surgery and the RIWO D-URS, a three channel single-use ureteroscopy to provide versatility and optimized endoscopic visualization.

Shaped by the needs of the surgeon.

Our Specialties

Richard Wolf delivers solutions that are changing lives.

Urology

Cystoscopy
Ureteroscopy
Resection
Urological Laparoscopy
Nephroscopy
Laser Enucleation (BPH Therapy)

General Surgery

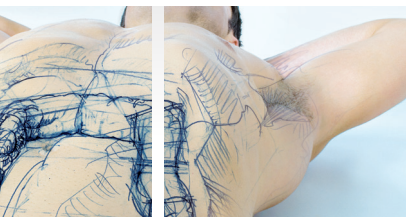

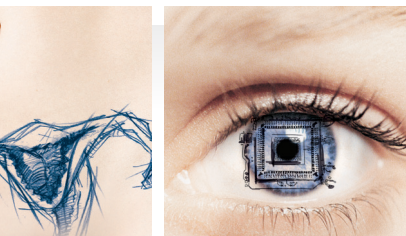

Laparoscopy
Mini-Laparoscopy
Minimally Invasive Bariatric Surgery
Additional Minimally Invasive Procedures

Gynecology

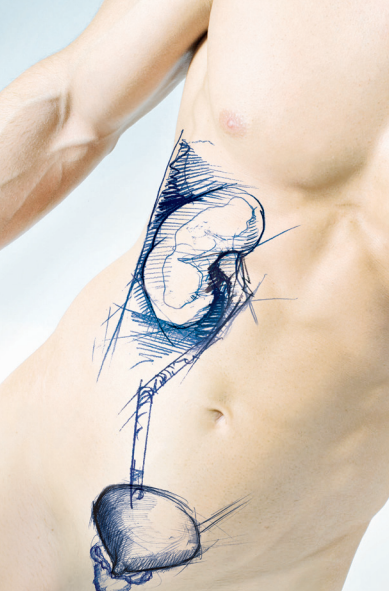

Diagnostic & Therapeutic Hysteroscopy
Resection
Gynecological Laparoscopy

Thoracic Surgery

Mini-Thoracoscopy

Urology

Richard Wolf has been one of the most trusted names in urology for more than a century. With a comprehensive portfolio of office and OR solutions, our product line can be used for cystoscopy, resection, ureteroscopy, nephroscopy, and laser enucleation. Our portfolio includes the market's only dual-channel flexible ureteroscope and new three channel, single-use hybrid ureteroscope, the RIWO D-URS; as well as a complete morcellation system for the treatment of benign prostatic hyperplasia (BPH). Richard Wolf urological endoscopes provide exceptional visualization, irrigation, and durability.

ERAGON bipolar

ERAGON modular

Richard Wolf is proud to offer cutting-edge solutions for minimally invasive surgery.

We have always placed the highest premium on durability and versatility, and nowhere is this more evident than in our laparoscopic instrumentation. We offer a comprehensive portfolio of jaw patterns for standard and bariatric laparoscopy as well as a full set of 3.5 mm instruments for mini-laparoscopy. When it comes to visualization, our ultra high-definition telescopes are second to none.

Gynecology

From the operating room to the office, our advanced precision technologies are helping **gynecologists achieve better outcomes**. Our comprehensive product portfolios for diagnostic and operative hysteroscopy, laparoscopy and electrosurgery, are designed with the same high standards of quality, accuracy, and user-centricity that you require. With leading products like the 3.9 mm Compact Hysteroscopes, one of the slimmest, all-in-one hysteroscopes on the market, and trusted solutions like the 7 mm Princess resection system, Richard Wolf has established itself as a leader in minimally invasive gynecologic surgery.

Reprocessing

Care and Handling

The ability to effectively clean and sterilize a reusable medical instrument is critical to its functionality and longevity, and more importantly, to ensuring patient safety. All reusable Richard Wolf products are designed to stand the test of time. They are manufactured with materials that can handle repeated exposure to cleaning chemicals and sterilization processes, and are made with components that can be easily disassembled for streamlined reprocessing.

We offer a full line of complementary sterilization and reprocessing solutions: scope protectors, cleaning brushes, and custom reprocessing trays designed specifically for Richard Wolf instrumentation.

Our commitment to reprocessing excellence goes beyond our products themselves. Throughout the year, our clinical specialists travel the country training central service professionals—those who are entrusted with the vital processes that take place before a surgeon ever steps into the operating room.

We are Richard Wolf.

Richard Wolf Medical Instruments Corporation

Richard Wolf Medical Instruments Corporation, the first and largest of Richard Wolf's global subsidiaries has been serving the US market since 1972. Geographically, we are right where we need to be—in the heart of the Midwest, just north of downtown Chicago. Our centralized location allows us to quickly ship new and repaired instruments all around the country.

Richard Wolf's US headquarters is home to production, sales and marketing, repair, customer service, and administrative teams; as well as a state-of-the-art biolab and training facility, Academy Prima Vista. Out in the field, our clinical experts and sales representatives are supporting accounts all across the country.

200+ employees from
18 countries

At first sight.
Richard Wolf Academy Prima Vista

Richard Wolf Academy Prima Vista is located at Richard Wolf Medical Instruments Corporation in Vernon Hills, Illinois. This state-of-the-art bio-lab and 60-seat lecture hall is part of the Prima Vista worldwide network. Since 2010, Richard Wolf Academy Prima Vista USA has established, peer-to-peer learning at its best. Through a combination of didactic and hands-on instruction, our training programs give physicians, product sales representatives, and new employees an opportunity to learn our products and their specific clinical and therapeutic applications.

Our continued focus on training our own members of our sales force is a commitment to our customers. In accelerated workshops, on-line seminars, and our on-site training program, sales representatives are able to learn from leading surgeons and our full team of clinical experts so that we can give our customers the very best clinical and technical support.

GUARDIAN

SERVICE BY RICHARD WOLF

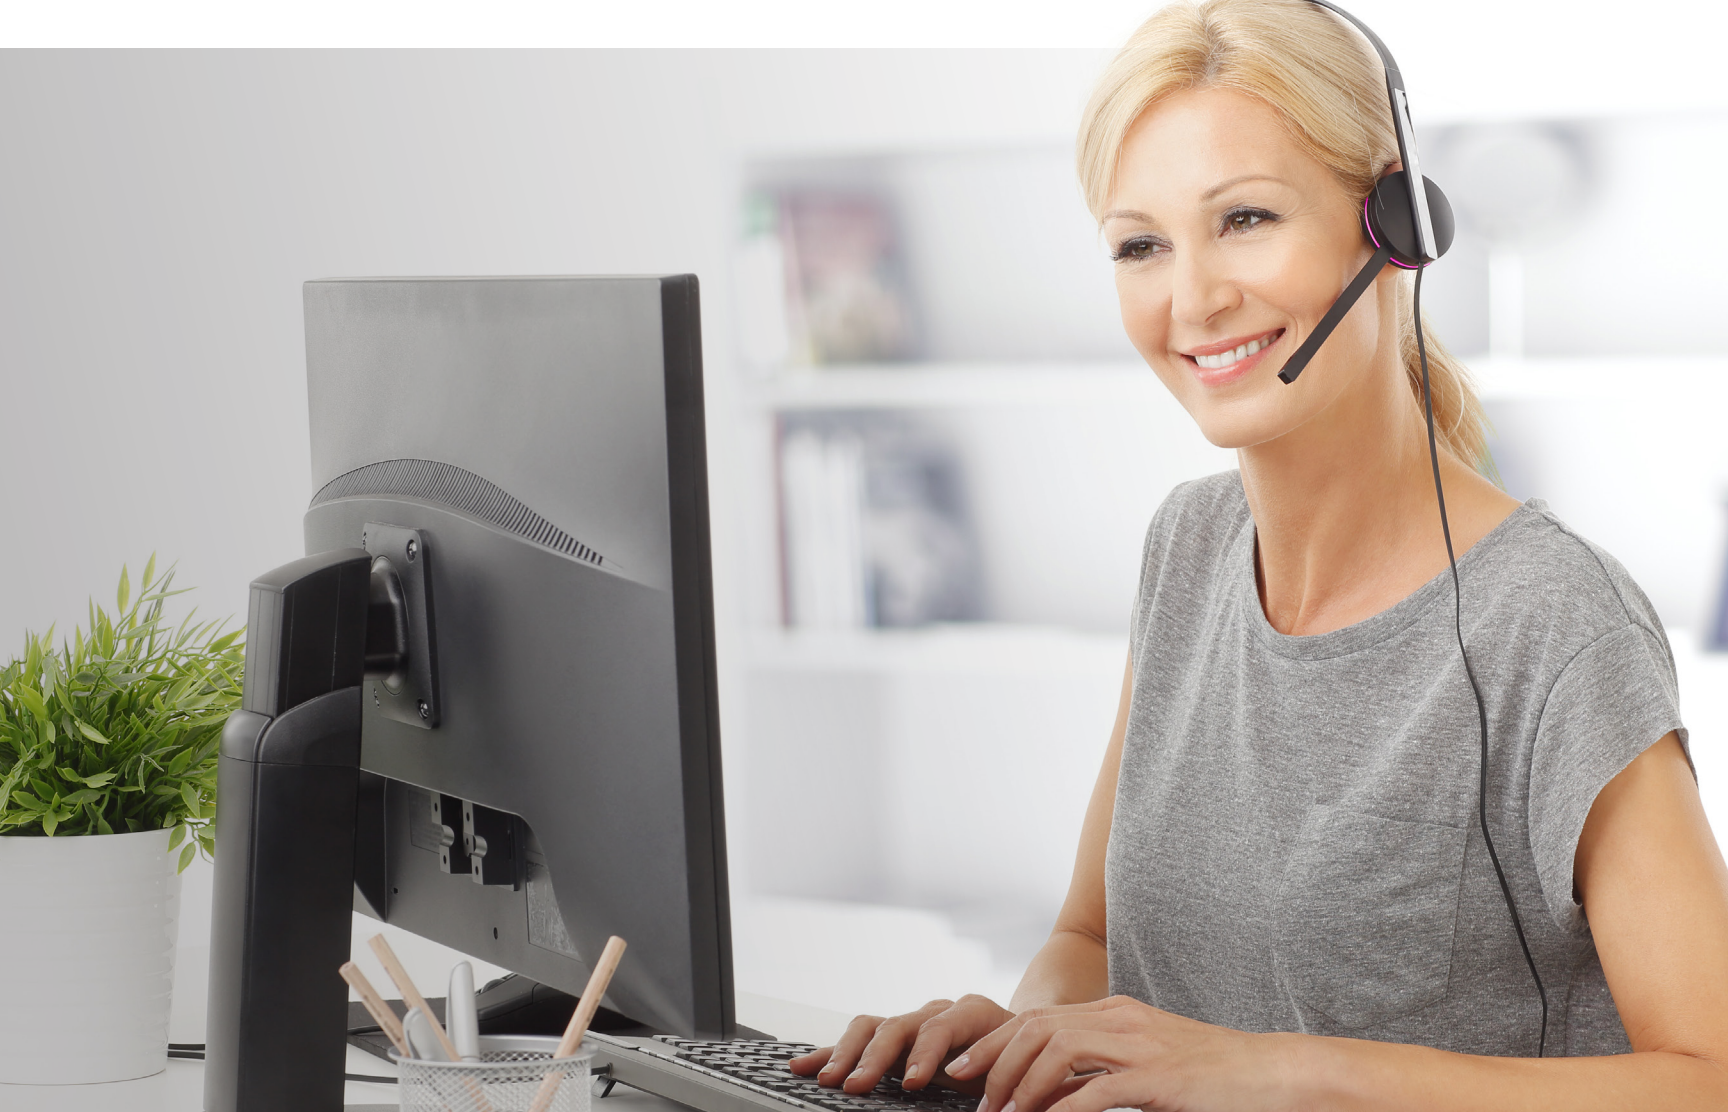

Protecting Performance.

We are committed to providing consistent, reliable and high quality repair services.

Our customers rely on us for repair exchanges of endoscopes to assure procedures are accomplished safely and efficiently. Our Guardian Service is essential for a complete customer solution.

We have a comprehensive service framework, designed to save our customers time and money. Our team has the training, experience and parts that are unmatched by any independent service provider. With every service opportunity, we aim for high quality and fast turnaround. Our objective is to provide repaired devices that are ready to perform like new.

The Guardian Service Portfolio addresses a range of customer needs from full service (Guardian Platinum) to transactional (Guardian Gold). No matter the choice, Richard Wolf is dedicated to helping our customers achieve their clinical and operational objectives.

Customers come first.

Richard Wolf Customer Service

Customers are making a major investment when they choose to partner with Richard Wolf. We recognize the weight of this decision and do everything we can to ensure they have the support they need to deliver their best care. Richard Wolf products speak for themselves, but it is our commitment to customers that sets us apart.

It takes a team to deliver timely, reliable customer service. From sales representatives and clinical experts out in the field to product managers and customer service specialists in the home office, all of us at Richard Wolf put customers and patients first.
